How long will a shower take to restore?

This depends on how badly stained the glass is (Some we can't even see through). Mostly we can restore your shower, clean up and be on our way within an hour.

Stainless Steel & Metal Fittings

Are easily restored & cleaned back without damage and harsh scratching.

VISIT OUR WEBSITE & SAVE

Marine Glass:

Restore, Don't replace. This saves taking the boat out of service, suffering from leaking seals and the huge expense associated with replaced glass or passengers not traveling again due to the hideous view. The average Large Vessel Bridge window is 'amour plated', and can cost upward of \$2500 per window.

Automotive and Exterior Glass:

Acid Rain Spots or Water Stain Damage, "Low light" driving with dangerous window view. Have your windows restored back to CLEAN - Our 'NON ABRASIVE' technology will save you thousands \$\$ on replacement.

DIY Full IP Paste packs available.
Get it done yourself

Keep your glass stain free
